

CHINTALA SAI VARUN

 TryHackMe  Personal Mail  Professional Mail  Chintala SaiVarun  Chintala SaiVarun  CodeChef  LeetCode

Summary

Computer Science undergraduate with experience in backend development using Spring Boot, REST APIs, MySQL, and JWT-based authentication. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, and Computer Networks. Hands-on experience in cybersecurity, malware analysis, and secure application development. Interested in software engineering, cloud technologies, and security-focused systems.

Skills

- **Languages:** Java, Python, C
- **Development:** React, Spring Boot, REST APIs, JWT Authentication, Spring Security, MySQL
- **Cloud & DevOps:** AWS, Docker, Git
- **Cybersecurity:** Malware Analysis, Network Traffic Analysis, API Security, OWASP Top 10, Threat Hunting
- **Tools:** Postman, Linux, Wireshark, Burp Suite
- **Core CS:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Experience

Java Full Stack Development Intern

April 2025 – June 2025

EduSkills (Supported by NEAT Cell, NCTE)

- Developed backend services and REST APIs using Spring Boot
- Designed and tested API endpoints for reliable frontend-backend integration
- Improved database performance through SQL query optimization and schema refinement
- Worked with authentication workflows and API testing using Postman

Projects

Secure Ride Sharing Backend System

- Developed a scalable ride-sharing backend using Spring Boot and MySQL with RESTful API architecture
- Implemented JWT-based authentication and role-based access control for secure user management
- Optimized ride and booking queries using indexing and pagination to improve API response performance
- Designed modular backend services for ride booking, trip history, and driver allocation workflows

Malware Analysis & Threat Detection Lab

- Built an isolated malware analysis environment to safely execute and monitor suspicious samples
- Analyzed 30+ malware samples across multiple threat families using behavioral and network indicators
- Developed a machine learning-based classifier to identify malicious execution patterns from collected system activity
- Used Wireshark and system monitoring techniques to inspect traffic behavior, persistence mechanisms, and suspicious processes

Education

Koneru Lakshmaiah Education Foundation, Vijayawada

2023 – 2027

B.Tech in Computer Science and Engineering

Current CGPA: 9.56

- Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design

Certifications

- AWS Certified Cloud Practitioner (CLF-C02)
- Oracle Certified Foundations Associate – AI Foundations (OCI)

Achievements

- Solved 400+ algorithmic problems across LeetCode and CodeChef
- CodeChef 2 Programmer (Highest Rating: 1426)
- Completed 100+ hands-on cybersecurity labs on TryHackMe covering network security, web exploitation, privilege escalation, and threat analysis
